2nd July 2021

Dear Sirs

Buxted Parish Council has a policy (permitted by the Local Government Act 1972, Section 137/142) of making grants that contribute to the welfare of the parish community, for example by improving and supporting local facilities. I am contacting you to inform you this process is about to begin for the financial year of 2022-2023.

I attach the standard application form and a copy of our Grants Policy, should you be interested in applying for funding.

The Parish Council will need to allocate a finite amount for Grants within the budget for 2022-2023. This means that you may not receive the full amount of grant you applied for, depending on the number of other successful applications received.

Finally, I would like to stress the importance of returning the application form before the closing date of 1st September 2021. This is so the parish council can consider all of the grant applications received together and then make their decisions on the amounts to be awarded, as this will impact on the amount of precept that we request from Wealden District Council when setting our budget for the financial year.

As the amounts of grants given will come from the precept, and therefore need to be budgeted for, the parish council will not process grant applications at other times during the financial year, unless an emergency arises.

Yours truly,

Claudine Feltham
Clerk to the Parish Council
